this book explores an organic vision of company innovation through an analogy with dna and its four nitrogenous bases like all living organisms a company has the fundamental genetic bases of its ability to innovate this dna mutates under both environmental influences and evolutionary factors allowing a company to develop new patterns of behaviour at the dawn of the 21st century the result of this process is the emergence of what we could call the hyperconnected company through this ongoing metaphor the book provides decision makers with several paths along which to

increase their ability to innovate taking advantage of genetic bases such as their own factors of change the study is based on observations made of large companies for whom innovation is an absolute imperative it alternates theoretical analyses with concrete illustrations and spotlights innovation leaders such as louis vuitton 3m bouygues telecom bnp paribas siemens danone air liquide to name but a few

blockchain and digital twins for smart healthcare describes the role of blockchain and digital twins in smart healthcare covering the ecosystem of the internet of medical things how data can be gathered using a sensor network which is securely stored updated and managed with blockchain for efficient and private medical data exchange medical data is collected real time from devices and systems in smart hospitals the internet of medical things this data is integrated to provide insight from the analytics or machine learning software using digital twins security and transparency are brought through a combination of digital twin and blockchain technologies provides the fundamentals of blockchain digital twins and iomt presents a useful guide for readers on the new applications of blockchain the medical digital twin and iomt explores how blockchain and digital twins can be used in the iomt smart hospitals and for future healthcare services
